## **DETAILED ACTION**

## Response to Arguments

Applicant's arguments filed November 18, 2005 have been fully considered but they are not persuasive.

Regarding claim 1, the argument on page 4 of 6, that the prior art of Asano (US 4,241,385) does not discloses a vehicle charger, the examiner has broadly interpreted the vehicle to be the charger since the it is old and well known that vehicles are equipped with an alternator that charges the battery and the mobile device is the flashlight, since a flashlight device is a device that is used in a mobile.

Regarding claim 16 and 17, the argument that the prior art of Posses (US 5,903,135) terminal 4 does not have a light source mounted thereon, the first plug of Posses has a first plug that is connected to a outer housing 4 that has a light source 7 this is taught in figure 1 of Posses.

Regarding claims 1, 8 and 16 that the arguments on page on page 5 of 6 that the prior art of Eisenbraun (US 6,551,142) does not teach the plug 14 adapted to connect to a electronic device, but to a cigarette lighter, the examiner has broadly interpreted under MPEM 2111 to interpret the mobile (vehicle) device (lighter) and traverse the argument that the adapter doe not connect to a electronic device, since an electronic device was not found in the independent claims.
